windstop smart

Height Adjustable Glass Balustrades by MEF!

WindStop Prime and WindStop Smart are the names of brand new systems that will provide protection against wind in open areas such as open air restaurants, gardens, terrace, roof tops, villa gardens and seaside. The elegant and modern design of the two windbreaker balustrade models will add value and difference to your spaces...

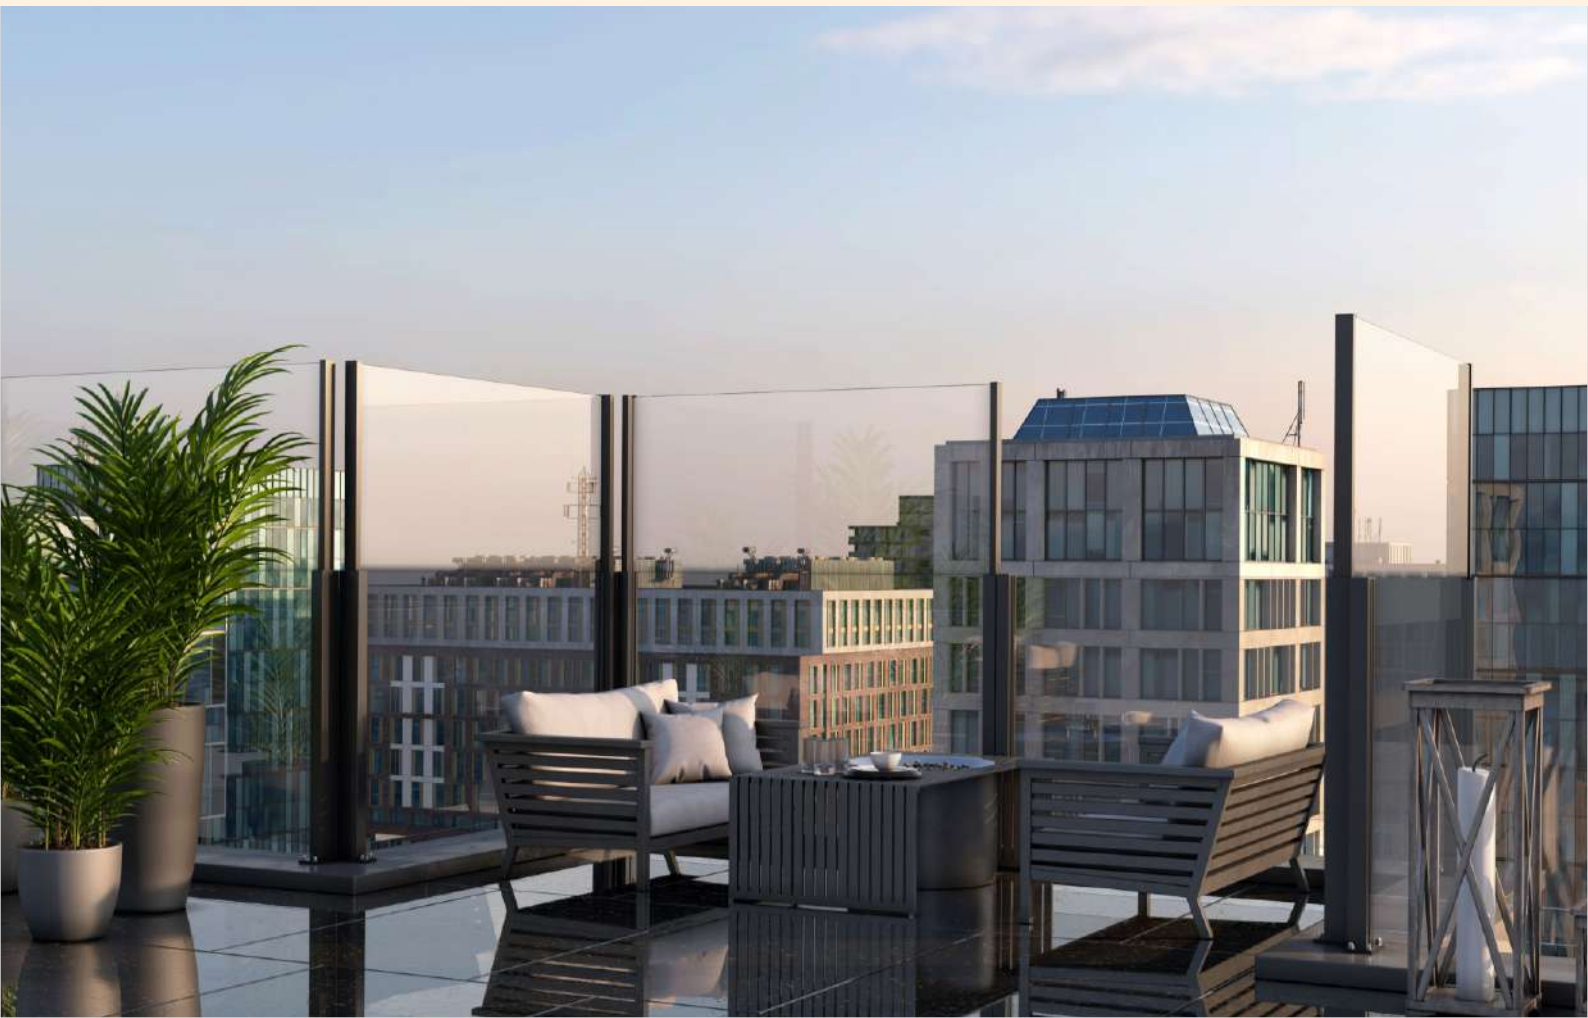

Both systems are perfect for your terrace or balcony. With the *WindStop* product, you can easily offer your customers a comfortable experience against windy weather in commercial spaces with open air areas such as restaurants and cafes. The enjoyment of your guests is not interrupted in windy weather, windy weather conditions are no longer a problem in commercial areas. Your guests will be protected from wind and rain in a warm and comfortable glass courtyard at any time of the day.

One touch!

WindStop Smart, produced as a ready-made panel, creates a wind shield that can rise up to 190 cm with a single touch with its strong frame structure and safety glasses.

WindStop Smart is made of glass and aluminum, so it is maintenance free wherever you use it! The panel is pushed to height of 1.90 meters by 2 internal synchronized gas springs that are completely maintenance free. Tapping the moving glass from above starts a synchronized lift up of the glass. Windbreaker Windstop glass balustrade panels are divided equally according to the measurements in the application area. Glass balustrade panels can be produced from width of 80 cm and up to maximum width of 180 cm.

MEF Metal

ELEGANT

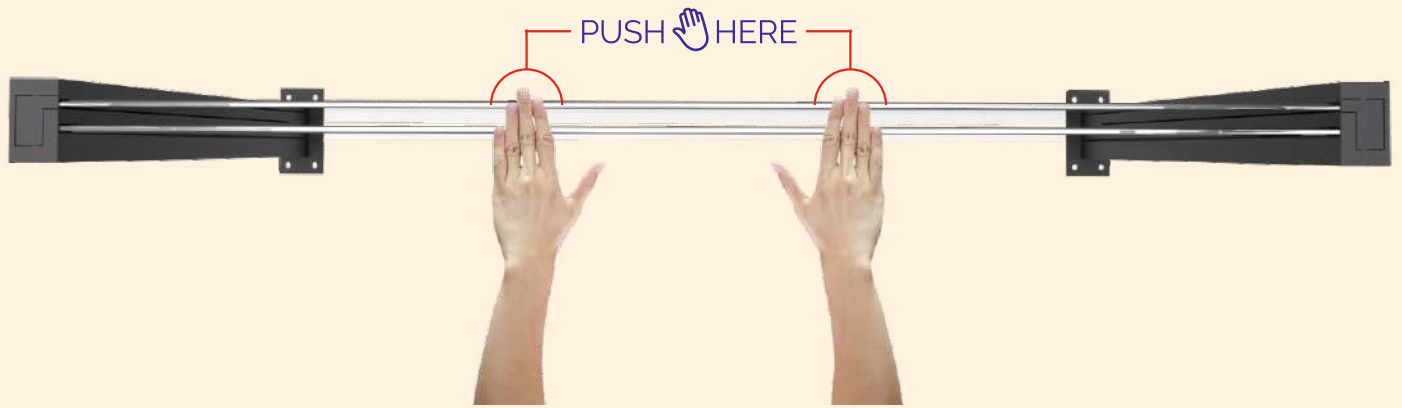

INNOVATIVE

Elegant Design

WindStop Smart has a completely minimalist, simple and stylish design thanks to the use of less aluminum material and the design where glass stands out.

MEF Metal

STYLISH

Easy to Use

It has a smart mechanism that you can raise up to 190 cm with a single touch.

Durable & Safe

Correctly designed strong aluminum posts. Steel bases connected to the posts at four points. 4mm + 4mm thick laminated glasses used in both fixed and moving glass make the system extremely safe.

Fast Installation

Panels are sent as ready-to-use prefabricated according to the application area dimensions. Just unpack and fix it to the ground.

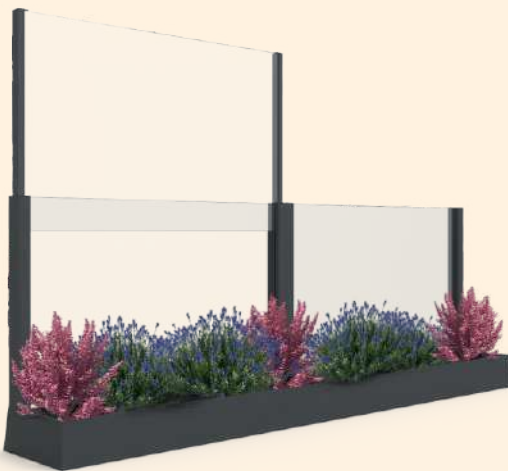

EXTRAS

RAL colors
can be applied.

Integrated Planter Support (Optional)

The WindStop retractable glass balustrade can be attached to a robust galvanized and electrostatic powder painted base designed that functions as a flower pot and counter weight against winds. Refurbish your restaurant, cafe and terrace with a new planter support for your wind breaker glass railing.

Wheeled Base (Optional)

Optional trolley support with brakes on each wheel for places where fastening is not possible onto the ground.

Windstop cannot be used with wheeled bases as wind barrier against wind. its suggested to be used as separator in indoor commercial areas and in windless outdoor places.

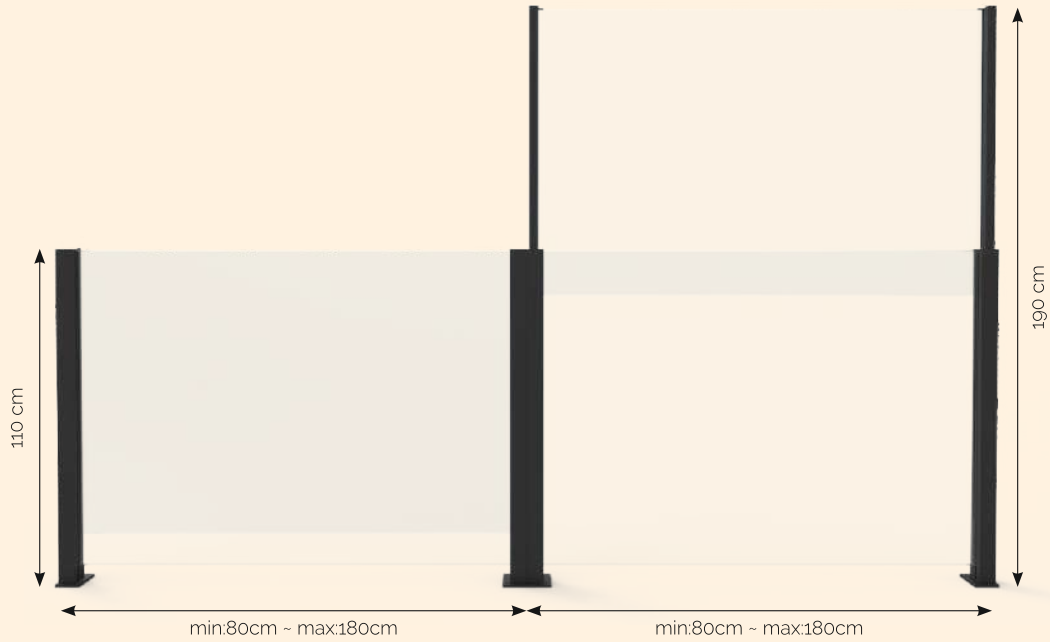

Reinforced Support (Optional)

Height adjustable floor fastening support.
