MEF visiable on floor glass supporting systems distinguish your valuable projects with it's durability, aesthetic and being a brand new system. Floor fixings which are produced from aluminium provides the durability by making the connection between floor and glass. Aesthetic view appears when floor fixing parts are closed by cap profile. You will create the difference with different color variations of cap profiles.

N50R is the continous base shoe profile for fascia mount application. Aluminium profile is pre-drilled and in 500cm length. Extension at the bottom of aluminium profile has advantage to affix the anchor bolts to underside the slab. Glass panels are fixed with the wedges into aluminium base shoe profile. Cladding covers are hiding anchor holes at the front side of profile and cladding covers have different options of anodizing and powder coating colors.

New MEF N50F anodized aluminium base shoe is perfect for both interior and exterior frameless glass balustrades that require floor mounting.
It s F-shaped design makes it the optimal choice for applications under cement screeds during new constructions. When mounting directly on the floor, this base shoe profile can be covered by a profile to hide the installation holes and anchor bolts. Simply affix to the floor of the balcony with an anchor bolt before inserting the glass panel. Install the glass panel by putting it inside the profile.

The **MEF** Standoff Glass Adapters are fully frameless glass railing systems that eliminate vertical posts. Standoff Glass Adapters allow the glass to "float" off the fascia and are not visible from the interior side of the glass, giving the seamless appearance of almost no railing at all. **MEF** Standoff Glass adapters are compatible with 8+8mm and 10+10mm glass. Available in a variety of styles and sizes, Standoff Glass Adapters are sleek and contemporary, providing an artistic appearance that enhances both interior and exterior environments.

V320

V320 Square model glass spigots are commonly used for creating fenced areas around entrances, walkways, decking or swimming pools, glass spigots can also be used as short posts to elevate or increase the height of existing structures. These economic frameless glass railing solutions are an easy and effective way of creating impressive designs for residential and commercial buildings.
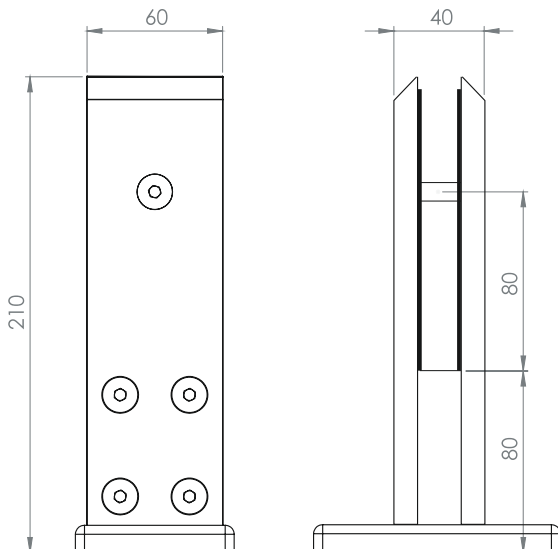

V330 spigot holds the glass with wedge. There is no need to drill the glass. When combined with toughened glass, you get high-quality balustrade suitable for a wide range of applications. Add contemporary style to homes. Whether for the outer area of a swimming pool or raised decking, this balustrade is the perfect blend of looks, function and versatility..

V330

Frameless glass juliete balcony is great for inward opening doors in bedrooms etc. It allows a clear view out from the room and brings the outside in. Designed to building regulations, the balcony will achieve 1100mm (1.1m) high. In spite of this minimalist design, the sleek vertical aluminium profiles will let you create Juliet Balconies that span distances up to 2800mm.
Juliet series have 2 options.

## Beautiful, contemporary, modern and unobtrusive...

Frameless glass juliete balcony is great for inward opening doors in bedrooms etc. It allows a clear view out from the room and brings the outside in. Designed to building regulations, the balcony will achieve 1100mm (1.1m) high. In spite of this minimalist design, the sleek vertical aluminium profiles will let you create Juliet Balconies that span distances up to 2800mm.
Juliet series have 2 options.

• Side mount type
• Window frame mount type

Height (H)	900 mm	1000 mm	1100 mm
A	315 mm	365 mm	415 mm
B	585 mm	635 mm	685 mm
C	855 mm	905 mm	955 mm
X	45 mm	95 mm	145 mm

Glass width up to	Minimum Glass thickness
1200 mm	10.76 mm
1400 mm	12.76 mm
1700 mm	16.76 mm
2800 mm	21.52 mm
